Working Paper on Sector Accounts: Annual Results for Main Aggregates

This paper presents main annual aggregates for institutional sectors from 1991 onwards. The calculation is in line with the European System of Accounts (ESA 1995) which is based on the international System of National Accounts (SNA 1993). ESA 1995 provides compulsory concepts and definitions for the member states of the European Union.

According to ESA 1995 the following institutional sectors are shown:

- Total economy (S.1)
- Non financial corporations (S.11)
- Financial corporations (S.12)
- General government (S.13)
- Private households including non-profit organisations serving private households (S.14/15)
- Sector rest of the world (S.2)

Institutional sector accounts give an overview of the interactions among households, non-financial and financial corporations, general government and the rest of the world. All transactions between institutional sectors have been grouped into economically meaningful categories, such as compensation of employees, property income, taxes on income and consumption expenditure. The accounts include for instance the value of goods and services produced by each institutional sector, how income was earned and whether the income was spent or saved. Main aggregates are gross and net value added, operating surplus, disposable income and saving.

In addition, Destatis publishes quarterly sector accounts from 1999 onwards. The German central Bank (Deutsche Bundesbank) releases financial accounts for institutional sectors. For more information refer to www.bundesbank.de.

The Statistical Office of the European Union (Eurostat) publishes also regularly sector accounts for the EU. For further information refer to <http://epp.eurostat.ec.europa.eu>.
