

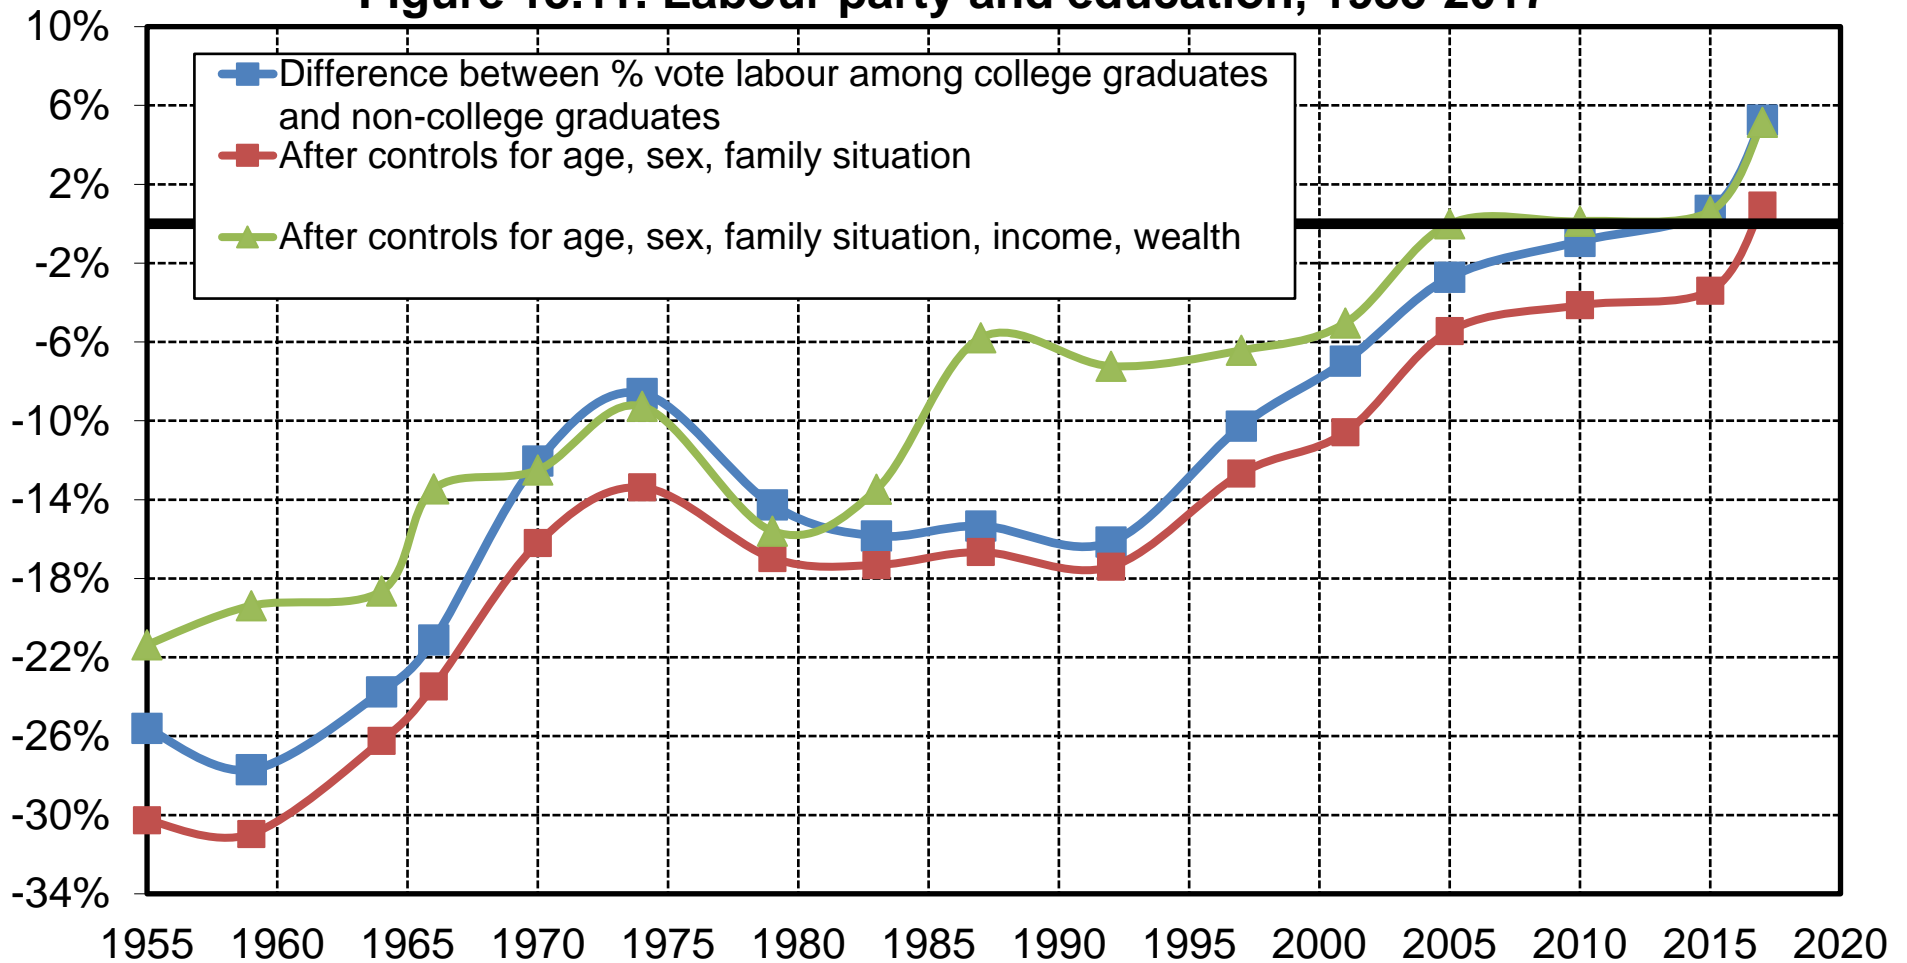

**Figure 15.11. Labour party and education, 1955-2017**

**Interpretation.** In 1955, the Labour party obtained a score that was 26 points lower among college graduates than among non-college graduates; in 2017, the score of the Labour party was 6 points higher among college graduates. Taking into account control variables does not affect the trend (only the level). Sources and series: see [piketty.pse.ens.fr/ideology](http://piketty.pse.ens.fr/ideology).
