

Figure S10.5. Income Inequality: the top percentile, 1900-2015

Interpretation. The share of the top percentile (the 1% highest incomes) in total national income was about 20%-25% in Western Europe in 1900-1910, before dropping to 5%-10% in 1950-1980, and rising again around 10%-15% in 2010-2015. The rebound of inequality was much stronger in the U.S., where the top percentile share reaches 20% in 2010-2015 and exceeds the level of 1900-1910. Japan is in an intermediate situation between Europe and the US. Sources and series: see piketty.pse.ens.fr/ideology.
